Saif-Eddine Bahiri

Bachelor's student in Cybersecurity & Cloud Computing · Web Development

sayfdinne180@gmail.com · +212 611 335 159 · Casablanca, Ain Chock · github.com/saif-sudo-afk

After a DUT in Computer Science, I am pursuing a Bachelor's degree at ESTK (Cadi Ayyad University). At GEBRAIN, I designed ASTA, an autonomous Python penetration testing agent, and built Student Hub with Django and React. I am looking for a cybersecurity internship where I can apply vulnerability analysis and web application security skills.

01 Internship experience

2026 · 2 months
Casablanca · remote

GEBRAIN · Cybersecurity internship · Cybersecurity and Penetration Testing Department
Certificate obtained

- Designed and developed ASTA (Autonomous Security Testing Agent), an LLM-guided penetration testing agent in Python on Kali Linux.
- Used and integrated security tools (Nmap, Nuclei, Feroxbuster, SQLmap, Hydra, Dalfox, Nikto) for penetration testing.
- Validated on authorized targets (a home router and an intentionally vulnerable demo web application): identified critical CVEs, up to CVSS 9.8; produced structured reports (CVE, CVSS, remediation).

2025–2026 · 1 month

Daknave · Technical internship · Dakoro project
Certificate obtained

- Designed and developed Dakoro, a full-stack inventory and sales dashboard (real-time KPIs and interactive charts).
- Built a Node.js/Express REST API connected to a React.js front end and designed the database schema (products, transactions, reporting).

Summer 2025 · 1 month
Dakhla

Crédit Agricole du Maroc (CAM) · Job-shadowing internship · IT Department
Certificate obtained

- Participated in the daily IT operations of a major Moroccan banking institution.
- Observed database and systems management practices in a regulated financial environment.

02 Academic & personal projects

2026 · GEBRAIN

ASTA · Python, Kali Linux, LiteLLM, SQLite
A security testing tool that coordinates specialized agents and turns their observations into structured reports. Used only within an authorized scope and with operator approval.

- Five-phase, multi-agent pipeline guided by LLMs (Groq, Cerebras, Gemini) through an OODA loop.
- Policy Engine, local CVE database, real-time monitor and automatic report generation.

2025–2026

Student Hub · Django, DRF, React, TypeScript, PostgreSQL
A multi-role platform for students, teachers and administrators, with courses, assignments, announcements and real-time notifications.

- Secure REST API (JWT, Google OAuth 2.0), role-based access control and deployment on Vercel (Neon, Cloudinary).
- Complete UML documentation and project delivery using the SCRUM method.

03 Technical skills

Security	Kali Linux, Nmap, Nuclei, Feroxbuster, SQLmap, Hydra, Dalfox, Nikto, WhatWeb, WafwOOf, CVE/CVSS analysis, pentest reports
Languages	Python, JavaScript, PHP, Java, SQL, HTML/CSS
Frameworks	Django, React.js, Node.js/Express, Laravel, Java EE
Databases	MySQL, PostgreSQL, Oracle
Networks & systems	Linux, DNS, DHCP, TCP/IP, VMware
Tools & methods	Git/GitHub, VS Code, Enterprise Architect, UML, SCRUM/Agile

04 Education

In progress

Bachelor's degree in Cybersecurity and Cloud Computing
ESTK, Cadi Ayyad University

09/2023–2026

DUT in Computer Science
EST Fkih Ben Salah, Sultan Moulay Slimane University
Coursework: object-oriented programming, UML modeling, network protocols, operating systems, databases and Agile project management.

05 Certifications

Internship certificates (GEBRAIN, Daknave, Crédit Agricole du Maroc) · SCRUM certificate (2025)

06 Languages

Arabic (Native) · French (B2) · English (C1)
